# WOMEN'S VOTES URGED AS CURE IN WALSH REPORT

Industrial Evils, Says Federal Commission.

WORKERS' SHARE OF WEALTH UNFAIR

Tipping Law Favored.

Chicago, Aug. 24.-Votes for women is named in the second section of the Relations Commission's main report, made public here to-day. DON'T TAKE A PIG as one of the great remedies for the unwholesome industrial conditions found in the commission's investiga-

a sketch of living and working conditions prevailing in American industry, particularly as affecting women and children, and it is this evil aspect of the situation for which woman suffrage is proposed as one means to bring

The crux of the whole matter is, the report asserts, that the workers have not received their fair share of the

report asserts, that the workers have not received their fair share of the enormous increase in the wealth of the country during the last quarter century. Figures are given showing that this increase has been from 65 to 187 Millions, or 188 per cent, whereas the aggregate income of swage carners in manufacturing and mining, the report states, are in poverty. The income of smiles in basic industries investigated was less than \$750 a year, and less than \$500 for a third, while the very least that would suffice for the average family was found to be \$700 a year. Seventy-sight per cent of the fathers carned less than \$700, the rest coming from the labor of the women and children in the family.

Pauper Burial for Many.

Despite the "repugnance of all takes to pauper burial," being so great that everything will be sacrified and heavy debts incurred to avoid it, it was found, nevertheless, that in New York City one out of every twelve bodies; and the children, the report says it has been proved that "there is a direct relation between poverty and the death rate of bables," it being shown in Johnstown, Penn., that "the bables whose leaves the month of the windows shore in the family.

"As a picture of American industry," says the report, "this presentation is vadeniably gloomy and depressing, but as diagnosis of what is wrong with American labor conditions it is true and exact."

Owing to the oppressive methods of absentee owners in squeezing the last cent out of their tenants, it is declared that their condition is pitiable, every member of the family being forced to foil to eke out a bare existence, preventing the children from going to school. Federal regulation of dealings wetween tenant and owner is pro
oned.
